I am a passionate web developer committed to delivering high-quality, optimized, and user-friendly web applications that meet business objectives. With expertise in various programming languages, frameworks, and content management systems, I stay up-to-date with the latest trends and technologies in web development.

## Experience

### Provincial Information of Technology Office – Web Developer

September 14, 2022 – May 31, 2023

- Built websites and various types of web applications from the ground up by translating business requirements into functional web applications, developing user-friendly interfaces, designing efficient databases, and delivering high-quality web applications that met business objectives.
- Ensured that websites and web applications were optimized for performance, security, and scalability by following web development best practices, including version control, responsive design, and user experience design.

### Public Employment Services Office – Web Developer Intern

March 25, 2022 – June 24, 2022

- Maintained and updated website content on a regular basis to ensure accurate and up-to-date information.
- Built a queuing system web application from scratch, involving developing its business logic, creating a user-friendly interface, designing an efficient database, and ensuring high-quality and scalability of the application.

### Technical Education and Skills Development Authority – Mobile Robotics Developer

March 2019 – March 2020

- Familiarize with logic, microprocessors, and computer programming and prepare specifications for the robot's capabilities as they relate to the work environment and also responsible for cost efficient design, cost-price calculations, and quality control.

## Education

### Eastwoods Professional College of Science and Technology – Bachelor of Science in Computer Engineering

2018 - 2022

**Awards:** Cum Laude; Best Design Project Developer;
